POWER. PERFORMANCE. VERSATILITY.

Advanced IP Telephones That Help You Work Smarter

Step up the efficiency and functionality of your IP communications system with the 5000-Series IP and digital telephones from Toshiba. Sleek good looks combine with sophisticated features and call-handling enhancements for increased productivity in any office setting. Equally suited to a single location or large, distributed enterprises with branch or virtual and remote sites, the 5000-Series is your best choice in a full-featured IP telephone system.

Toshiba's 5000-Series Telephone Models Offer:

- > Choice between IP telephones and Digital telephones
- > Integrated Gigabit Ethernet switch for fastest access to high speed network connections (IP telephones)
- > Large, backlit display for superior readability in variable light environments (Non-backlit models also available)

Off Hook Call Announce through speaker or handset

Full duplex speakers for superior sound

Sleek, functional styling

Improve your office ergonomics with the slim profile and unique tilting base that adjusts to eight perfect angles.

- > Sleek low profile design and unique tilt-base for versatile phone placement
- > Onscreen prompts that help you complete common tasks
- > Programmable one-touch buttons for fast access to calling functions

- > Full-duplex speakerphone (half-duplex models also available)
- > HTML and Java support with customizable applications
- > Integrated Headset Interface

One-touch programmable buttons for fast access to advanced calling functions

Onscreen prompts guide users through common tasks

Large 9-line Backlit display for easy readability

Navigation Button

Mutes microphone and handset simultaneously
